

**Amendments to the Abstract:**

Please replace the previous Abstract with the following redlined Abstract:

**ABSTRACT OF THE DISCLOSURE**

~~Proposed is~~In a method and a system for work time recording, ~~in which a~~  
data recording client (10,...,16) records biometric data and/or data on physical condition  
of the user (1), and transmits it together with the user data over a first communication  
channel (30/31) to the central unit (20/21). The user (1) is identified based on the  
transmitted biometric data and/or data on physical condition and biometric data and/or  
data on physical condition of users stored in the user database (40). The analyzed data  
are transmitted to a remuneration recording module (50), and are evaluated and/or  
checked by means of the remuneration recording module (50).
